---

**09 Best men's fashion collection**

---

**10 Best new grooming product**

---

**11 Life enhancer of the year**

# 11 LIFE ENHANCER OF THE YEAR SHORTLIST

## Apple Watch Hermès, by Apple and Hermès

**Key features:** A smartwatch pairing Apple's pioneering innovation with Hermès' uncompromising craftsmanship  
[apple.com](http://apple.com)

High style and tech smarts have never been more in sync than in this year's surprise pairing: the Apple Watch Hermès. The initial Apple Watch launch, back in April, came close to breaking the internet (or at least the pavement outside Apple stores globally), and this latest amalgamation of craftsmanship and technology hit a luxury high when it was announced in September. So now, in addition to sleep tracking, step counting and waving for contactless payment, serious fashion cred is well within arm's reach.

## Drinkable perfumes, by Kille Enna

**Key features:** Aromas that can be sprayed into a glass before water is added, offering the taste and scent of a perfume at the same time  
[killeenna.com](http://killeenna.com)

Kille Enna, a Danish chef and cookbook author, has spent seven years developing Taste of a Scent, a line of four drinkable perfumes designed to be sprayed into a glass of water, like a fragrant cordial. Enna uses handcrafted extracts from raw plant materials to concoct the perfumes at her studio in Sweden, while the final aromas are extracted and filtered in a small factory in Denmark. The elegant aromas are then bottled in handsome flacons and packaged by Jack Dahl of Copenhagen-based studio Homework.

## MP 01 mobile phone, by Jasper Morrison and Punkt

**Key features:** Simple and deliberately 'unsmart'. Offers the bare essentials – calls, SMS, answer phone, calendar and clock – in clean, modern design  
[punkt.ch](http://punkt.ch)

In this era of information overload, Swiss manufacturer Punkt and its artistic director Jasper Morrison conspired to deliberately dumb down the mobile phone, putting technology back where it belongs – in our pockets and out of sight, out of mind. The MP 01 is modest, modern and minimal. There's a nod to German product design of the 1960s and 1970s, but it's dovetailed with detailing that makes the most of modern technology, including a crisp monochrome TFT screen and an utterly intuitive interface.

## Jean Prouvé's 6x6 Demountable House, by Rogers Stirk Harbour + Partners and Patrick Seguin

**Key features:** Demountable retreat with add-on kitchen and bathroom pods; solar panels; service trolleys for electricity and rainwater recycling beneath the frame; fold-up sundeck/shutter  
[rsh-p.com](http://rsh-p.com); [patrickseguin.com](http://patrickseguin.com); [stageone.co.uk/projects](http://stageone.co.uk/projects)

Seeking to ensure a classic design lives on, gallerist Patrick Seguin commissioned RSH+P to adapt a Jean Prouvé masterpiece – a 6x6m demountable house, conceived in 1944 as emergency housing – into an autonomous retreat. Two new cylindrical capsules host kitchen and bathroom, powered by two service trolleys that slide discreetly underneath the house – created with the help of engineers ChapmanBDSP and Arup. The redesign is sure to inspire exchanges about future demountable disaster relief housing.

## Enjoy online gadget store, by Ron Johnson

**Key features:** A technology expert will deliver your product – free and in as little as four hours – and give you an hour of set-up and instruction time. You'll also receive free ongoing support  
[enjoy.com](http://enjoy.com)

Enjoy is essentially a personal delivery service for tech goodies. Its USP, though, is that Enjoy's team are all tech-savvy and will guide you through the initial set-up of their deliveries. It was set up by Ron Johnson, seen as the brains behind Apple Store, and takes his Genius Bar concept on the road. Deliveries can be made anywhere, sometimes within as little as four hours and within an hour-slot. Delivery and set-up are free, but at the moment the service is only available in New York and the Bay Area. However, a roll-out seems inevitable.
